FIVE-YEAR SUMMARY

The financial ratios have been calculated as follows

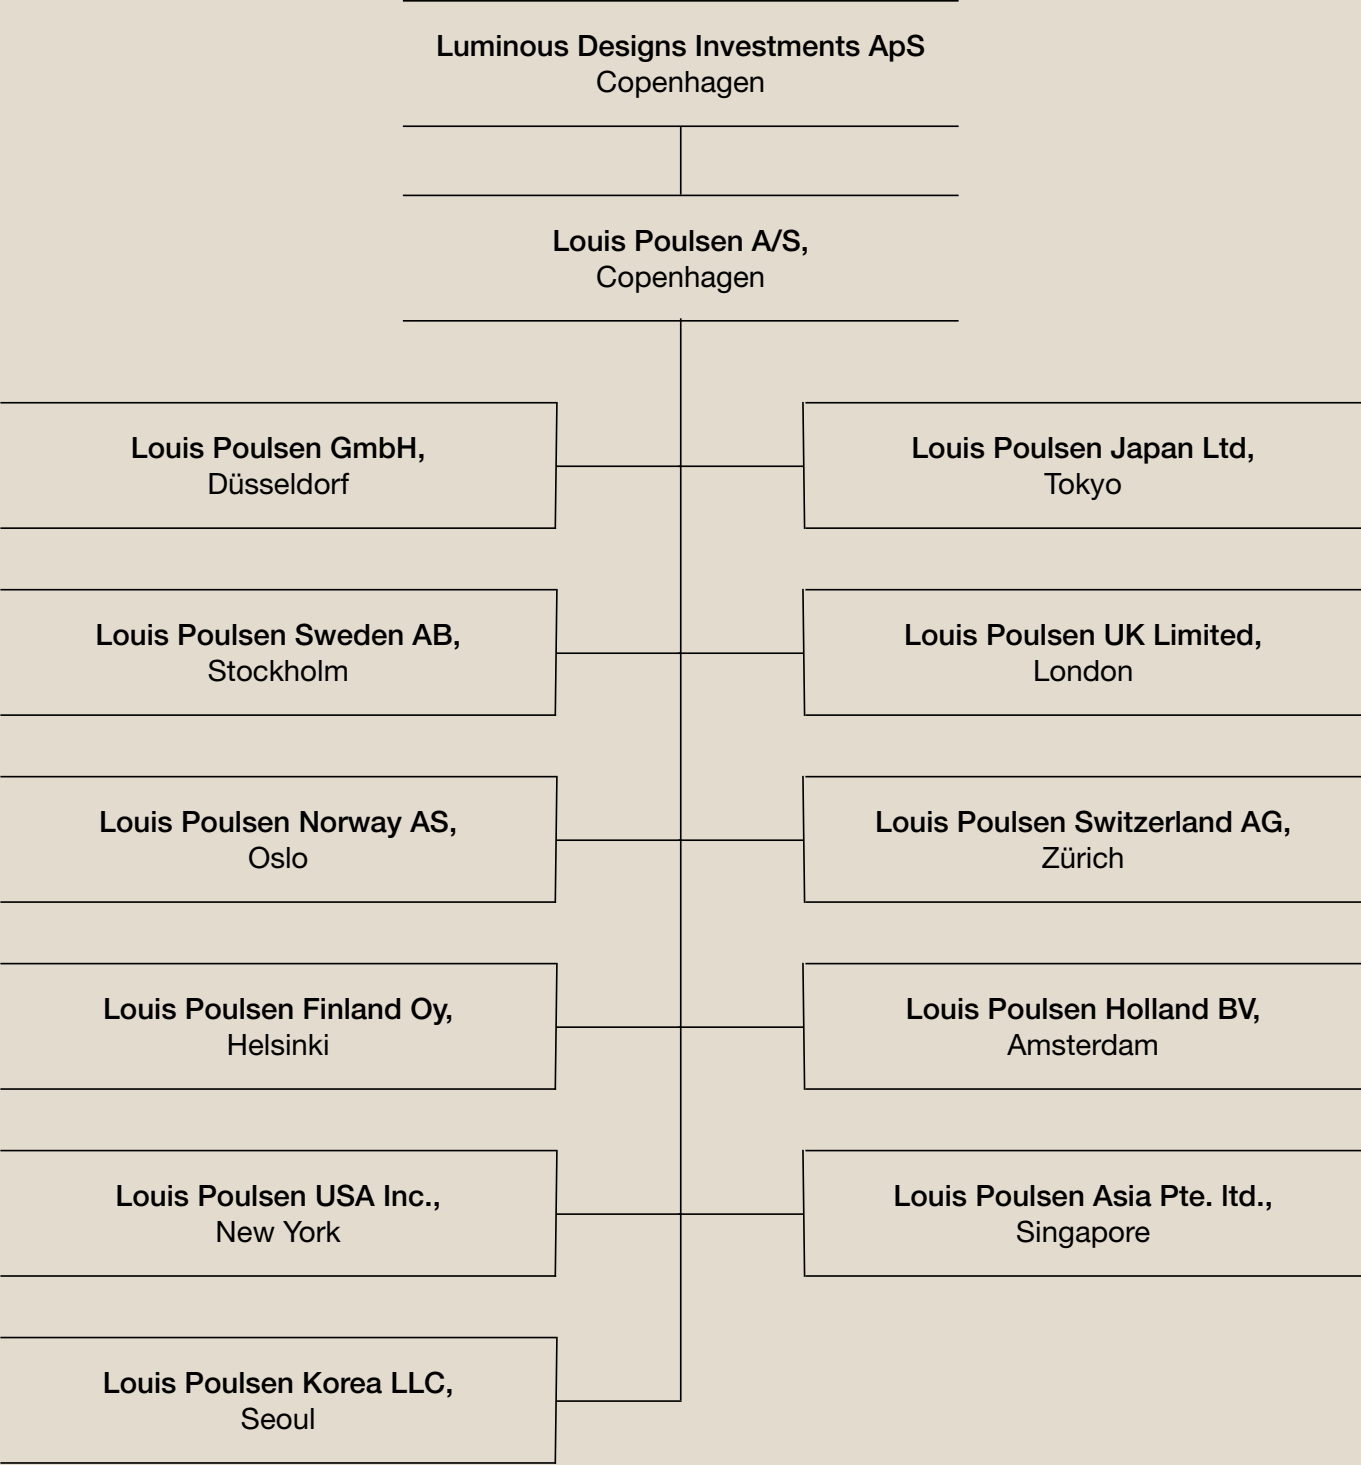

RATIOS	CALCULATION FORMULA	CALCULATION FORMULA REFLECTS
Net margin (%)	$\frac{\text{Profit/loss for the year} \times 100}{\text{Revenue}}$	The entity's operating profitability.
EBITDA ratio (%)	$\frac{\text{EBITDA} \times 100}{\text{Revenue}}$	The entity's profitability before depreciation and amortisation
EBITA ratio (%)	$\frac{\text{EBITA} \times 100}{\text{Revenue}}$	The entity's profitability before amortization
Solvency ratio (%)	$\frac{\text{Equity} \times 100}{\text{Total assets}}$	The financial strength of the entity
Primary ratio (%)	$\frac{\text{EBITA} \times 100}{\text{Average invested capital}}$	The return on invested capital in the entity

The average invested capital have been calculated as follows:
Total assets - cash - non-current assets except goodwill.

MANAGEMENT COMMENTARY

GROUP STRUCTURE

Louis Poulsen A/S has local Sales Representation Offices in Spain and France.

PRIMARY ACTIVITIES

The Louis Poulsen group manufactures and sells lighting fixtures to private consumers and professionals in Denmark and abroad. The group is internationally recognized for providing exclusive lighting fixtures of high quality and functional design. Louis Poulsen is an internationally acclaimed high-end lighting brand. Louis Poulsen build on a strong heritage, and always aspire to exceed expectations in delivering long-lasting design that shapes light for people and spaces. The products primarily serve the upper segments of the professional and private consumer markets that attach great importance to the unique lighting and the high quality levels. Louis Poulsen’s products fulfil the most stringent international demands for energy optimization and at the same time they meet the demand for a unique design as well as comfortable and glare free lighting.

DEVELOPMENT IN ACTIVITIES AND FINANCIAL MATTERS

2024 was the year where Louis Poulsen celebrated our 150-year anniversary as a Danish Company. An achievement we are very proud of and among other events were celebrated by different Anniversary Limited Editions of some of our iconic products.

In 2024, we achieved solid growth across multiple markets, despite persistently low consumer confidence, continuously geopolitical challenges and uncertainties in many geographies. We are pleased to have achieved a top line growth of 7 percent driven by our global brand momentum, especially in the business to consumer segment.

The top line growth is followed by a double-digit EBIT-margin growth. We also maintained a solid bottom line, while increasing our focus on brand awareness, innovation and developing of existing and new products and expanding retail channels and shopping experiences.

Our strong financial foundations allow us to invest for the future, confirmed by the world’s first Louis Poulsen Flagship Store, in Tokyo along with grand opening of our showroom on Madison Avenue in New York City.

We are utilizing our integration activities within the Flos B&B Italia Group to secure good cooperation in many areas such as digital transformation, go-to-market strategies, international opportunities, production and procurement just to mention some.

Revenue increased by 7 percent to DKK 897 million compared to DKK 837 million in 2023.

The gross profit margin increased by 3 percent to 52 percent in 2024 against 49 percent in 2023. Operating profit (EBIT) increased double-digit with 54 percent to DKK 177 million in 2024 compared to DKK 115 million in 2023.

The increase in revenue and in profit for the year in 2024 is in line with expectations set in the Annual Report for 2023.

Management considers the financial development to be satisfactory. Further information on the financial development for the subsidiaries is available in the annual report pages 22 and forward.

OUTLOOK

The economic outlook for 2025 remains uncertain. Navigating in the current macroeconomic landscape requires our Company to be agile to attract more customers to the Louis Poulsen brand, both new and returning.

In 2025, the Louis Poulsen Group expects revenue growth between 2 and 8 percent along with an increase of EBITDA between 2 and 8 percent.

The growth in revenue is expected to be achieved by continuously focus on brand awareness, expanding retail channels and shopping experiences, developing line extensions and introducing new limited editions.

Uncertainty to achieve the expected growth in revenue are the macroeconomic factors mentioned above. Our aim is to envision a world with only good light and are committed to giving people a better quality of life through exceptional lighting. To do so, we will continue to invest in innovation and deepen collaboration across our value chain and with other partners. This will ensure our efforts drive impact and contribute to the long-term success of Louis Poulsen.

RISK MANAGEMENT

Market risks

The group’s products are primarily positioned in the high-end markets. The macroeconomic development in the professional and private consumer markets will affect the financial results.

Currency risks

Due to sales activities in foreign markets and purchase from foreign countries, cash flow and net positions are influenced by changes in exchange rates for a number of currencies. It is group policy to cover commercial exchange risks. Hedging is primarily used to cover open foreign exchange positions related to trading activities in the next twelve months based on the budget. The group does not use speculative hedging.

Credit risks

The group’s credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company’s credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

INTELLECTUAL CAPITAL RESOURCES

The group has an experienced and highly competent staff working throughout the value chain. The group will continue to implement measures to attract and retain highly skilled staff with expertise in the development of lighting to ensure

future growth. Great demand is placed on the employees’ technical and craftsman skills and their ability to engage in a logistically demanding production process. The Danish labor market has been highly competitive in 2024, and there is a general increase in demand for talent within most areas, which is expected to continue.

To ensure high product quality and competitive production the group continuously optimizes production. This demands a high level of competence, and the group therefore continuously invests in competency development. It is, however, just as important for Louis Poulsen A/S to attract and retain both skilled and unskilled workers and employees with medium to higher education level.

During 2024 Louis Poulsen A/S has recruited competencies within the area of supply chain with focus on production, sourcing, R&D, delivery performance and project management. In order to adapt to the lower expectations in sales, the number of blue-collar workers have been adjusted in the factory in Vejen as well as white collar workers in other parts of the group.

RESEARCH AND DEVELOPMENT ACTIVITIES

Louis Poulsen continuously invests in development, updates and improvements of its product portfolio. Costs related to development of products are expensed in the income statement, or accounted for as an asset following the accounting policies.

GROUP RELATIONS

The consolidated financial statements comprise the parent company Louis Poulsen A/S and its subsidiaries being incorporated in the annual report of Louis Poulsen A/S. The consolidated accounts include profit and loss for all subsidiaries.

Louis Poulsen’s sales organization is based in Copenhagen, and the company’s production facilities are based in Vejen. The daily management is carried out from Denmark in close cooperation with our owners.

Sales and distribution outside Denmark are carried out through the 10 subsidiaries or through agents and distributors operating on behalf of Louis Poulsen A/S.

The Louis Poulsen group had 432 employees as of 31 December 2024, including 100 being employed in the subsidiaries abroad. The majority of the Danish employees are engaged in the company’s production in Vejen.

Development in staff:	Denmark	Subsidiaries
Number of employees beginning of 2024	327	101
Recruited during 2024	57	19
Leavers during 2024	-52	-20
Number of employees end of 2024	332	100

EVENTS AFTER THE BALANCE SHEET DATE

Louis Poulsen has significant global operations, including in the US and China. After the balance sheet date, geopolitical tensions have arisen in the form of potential trade barriers, tariffs etc. These factors can create both opportunities and threats for the Group, without affecting the recognised assets and liabilities at the balance sheet date. No other event has occurred after the balance sheet date to this date, which may materially affect the assessment of the Company’s financial position.

CORPORATE SOCIAL RESPONSIBILITY

STATUTORY REPORT ON CORPORATE SOCIAL RESPONSIBILITY

Business model

Louis Poulsen is a proud Danish manufacturer of premium lighting solutions. Our philosophy is deeply rooted in the Scandinavian design tradition where form follows function. Since our founding we have sought, not only to design lamps, but to shape light.

Louis Poulsen is internationally recognised for providing our customers with exclusive lighting solutions of high quality and functional design. Our products are sold to both the consumer and commercial markets in Denmark and abroad. With our unique lighting and high quality, we serve the upper segments of both markets in the product categories of Decorative, Outdoor and Indoor Architectural. All our products meet the demand for a unique design as well as comfortable and glarefree lighting as well as fulfilling international demands for energy optimisation.

At Louis Poulsen, our aim is to improve quality of life by providing functional products that make people feel good, both indoor and outdoor. Sustainability in terms of long-lasting products has always been a cornerstone of our business, and our products are long-lasting both in their durability and their design. Since Louis Poulsen was founded in 1874, timelessness has been a key element in our design philosophy, and we believe that the best designs are the ones that withstand the test of time. Creating long-lasting products and extending products life-time is also a way of decreasing the environmental footprint.

Since 2018, Louis Poulsen has been owned by Design Holding S.p.A. (now Flos B&B Italia Group S.p.A.) which is jointly controlled by the Carlyle Group with funds managed by Investindustrial. The Flos B&B Italia Group consists of complementary companies that all have a strong individual identity and significant design heritage.

Flos B&B Italia Group is a global leader in high-end design with a cultural heritage of European origin. Louis Poulsen's management and sales operation are based in our headquarters in Copenhagen while our production facility is located in Vejen, Denmark.

We believe that making business in a manner that respects people and environment is the source of long-term value creation and sustainable economic growth. Being a responsible company entails managing the impact we have towards all our stakeholders. The passion and creativity of our employees are the heart of our company and we want to ensure that Louis Poulsen is an engaging and safe place to work.

As part of assessing the sustainability topics that are most important to Louis Poulsen, we also assess the most material sustainability risks related to human rights, environment, social aspects and anticorruption on an annual basis. The most material risks identified can be found below.

Being a responsible company entails considering a wider spectrum of stakeholders in our decision-making.

We want to do business in a way that minimises negative impact on people and the environment and supports positive value creation. However, we acknowledge that we still have a long way to go in implementing systematic sustainability management in line with best practice. This is why we have set up an action plan to define and implement required activities to take the necessary steps in the right direction.

Our goal is to reduce the environmental impact of our value chain and improve resource efficiency. The main risk of negatively impacting the environment and climate relates to energy use, waste from our operations, transport of our products and the business travel undertaken by our employees. Our environmental and climate policy addresses our responsibilities as they relate to our products and our operations. In line with our environmental policy, we strive towards continuous improvement in our day-to-day operations where we focus on reducing waste, energy use and greenhouse gas emissions.

HUMAN RIGHTS

Louis Poulsen believes upholding human rights is fundamental. The company draw its understanding of these rights from the Universal Declaration of Human Rights, its related treaties and declarations, and the broader ethical reasoning behind their development.

Potential risks

Potential exposure to human rights risks along the supply chain (e.g. child labour, bonded labour or living wage).

Current mitigation activities

- Long-lasting relationship with key suppliers, also through ESG risk assessment and oversight.
- Ethical requirements related to human and labor rights for suppliers.
- Implementation of the principles of the Supplier Code of Conduct and Code of Ethics.

Our comprehensive training programs in 2023 and in 2024 led to a notable increase in employee awareness and understanding of human rights, fostering a more inclusive and respectful workplace culture. Moving forward, our goal is to ensure that all new employees undergo comprehensive training in human rights upon joining the company.

ENVIRONMENT

Potential risks

Physical risks correlated with climate change on owned assets and facilities.

Physical risks correlated with raw material depletion and waste related impacts in the supply chain and direct operations. Transitional risks correlated with climate change and energy transition.

Potential interruption of procurement and distribution channels due to direct and indirect effects of climate change.

Reputational risks coming from noncompliance with environmental legislation both in own operations and across the value chain.

Risk of limited energy supply and rising energy costs following the outbreak of the Russian-Ukrainian conflict.

Inability to respond to market and legislative trends concerning the environmental impacts and performance of products.

Current mitigation activities

- Producing long-lasting solutions and investing in R&D to further expand products lifecycle and progressively reduce carbon footprint by using more sustainable materials and ensuring energy efficiency in use phase.
- Supply chain ESG risk assessment and oversight.
- Implementation of dedicated internal policies and lawcompliance activities.
- Compliance with the principles of the European Eco-design Framework Directive.
- Diversification of energy supply sources to ensure reliability in procurement.
- Implementation of the principles of the Supplier Code of Conduct and Sustainability Policy.

SOCIAL AND EMPLOYEE CONDITIONS

Potential risks

Inability to attract and retain talents with adequate skills and backgrounds.

Potential nonconformity or reputational impact related to cases of discrimination.

Inability to ensure high Health and safety standards and performance both within own operations and across the supply chain.

Current mitigation activities

- Employer branding initiatives and employee engagement.
- Implementation of adequate training and development programs.
- Implementation of a whistleblowing system and a Code of Ethics.
- H&S management systems along with clear guidelines and procedures for mitigating health and safety-related risks and accidents.
- Implementation of the principles of the Supplier Code of Conduct.
- Monitoring of H&S performance of key suppliers.

Louis Poulsen believes that its activities in 2024 have contributed to maintaining a good working environment. Louis Poulsen

expects to continue its work with ensuring a good and healthy work life for employees.

ANTI-CORRUPTION

Louis Poulsen doesn't tolerate bribery or corruption.

Potential risks

Potential non-conformity and reputational risks related to cases of corruption, unfair competition or unethical business practices.

Current mitigation activities

- MOG 231 and related procedures and instruments.
- Implementation of the Code of Ethics and Whistleblowing Policy.
- Full alignment with applicable national legislations Compliance Program.

In the financial year, no instances or allegations of corruption, bribery, or unethical behavior were reported or identified within our organization, indicating the effectiveness of our anti-corruption measures. In the future, we aim to strengthen our compliance measures by regularly reviewing and updating our anti-corruption policies to align with evolving laws and best practices.

COMPLIANCE PROGRAM

As Louis Poulsen operates across several cultures, traditions, local laws and practices, it is important that we ensure that all employees are aware of the common set of principles, which provide guidance about what Louis Poulsen considers responsible business practices and ethical behavior. These principles are outlined in the Flos B&B Italia Group's Code of Conduct (CoC). We have implemented measures to ensure that all employees are familiar with our CoC and that everyone reflects our policies. We consider the CoC to be a vital part of the organisation to ensure that we always work within the framework of the law and facilitate successful enforcement, in case of unethical or illegal conduct. The CoC is updated and improved on a regular basis to align with business requirements and stakeholder expectations.

DATA ETHICS

Data ethics is an important area for Louis Poulsen, including specific protection of personal data. Louis Poulsen has defined and implemented a set of rules for data protection to ensure compliance in relation to the company's collection, processing and storage of data.

Louis Poulsen's set of data protection rules and related guidelines (GDPR and IT Policy), form the basis of the company's Data Ethics policy. With this basis for Data Ethics, Louis Poulsen respects the expectations of our partners to operate in accordance with legal and ethical standards and we establish a solid basis for a trusting cooperation with our customers.

Louis Poulsen is committed to ensuring that all business and services are conducted in an ethically and legally impeccable manner and aligns business activities with the relevant requirements.

Louis Poulsen uses the necessary data for operating the business such as customer, supplier, HR and regulatory data. The data consists of master data received from the involved stakeholders and operational data either received from the stakeholders or generated during the operational processes. The processing of personal data, such as name, address, e-mail address or telephone number, is always in accordance with the general data protection regulation (GDPR) and the specific data protection rules of the country in question. The set of rules for data protection contains information about data controller and data protection consultant, data collection and data processing, duration of data storage and rights, etc. Louis Poulsen's set of data protection rules also contains information on data protection for business associates.

Louis Poulsen wants to ensure a fundamental development and permanent maintenance of suitable, target-oriented measures to raise the awareness of Louis Poulsen employees on data ethics.

Decisions about data use and new technology, including how the company's efforts and policies for data ethics are evaluated, are thus anchored in the organization through training and information, e.g. via intranet through the Louis Poulsen Group's Compliance rules.

The Executive Board and other senior executives are covered by bonus schemes that are based on yearly performance.				
Remuneration to three board members, incl. the Chairmen is paid by the ultimate parent, Flos B&B Italia Group S.p.A. Remuneration to two members of the Board of Directors is paid by Louis Poulsen A/S and amounts to mDKK 0.1 for 2024 and mDKK 0.1 for 2023.				
Share based payments				
Executive Board and Board of Directors and some senior managers were in 2019 covered by the parent company Flos B&B Italia Group S.p.A's share option program. The program entitles participants to acquire shares (call-option) in Flos B&B Italia Group S.p.A at a price based on a pre-defined price at the time of granting in 2019. No options were granted in 2023 and 2024. The call-option expires in 2026.

Actual taxes recognised in profit and loss	23%	40	24%	24	23%	34	24%	21
In the course of conducting business globally, tax and transfer pricing disputes with tax authorities may occur. Currently there is an ongoing tax audit regarding the application of an R&D tax incentive program that allows for an additional 30% deduction for R&D expenses. Management has concluded that it is probable that the taxation authority will accept an uncertain tax treatment, i.e. the tax deduction is recognised in the Tax for year (in the respective year). The total uncertain tax position amounts to 5.2 mDKK as a potential tax expense.

Impairment
With the exception of goodwill, all intangible assets are considered to have a infinite useful life. In the impairment test, the recoverable amount was compared with the carrying amount. The recoverable amount is based on a calculation of the value in use using cash flow estimates based on the budget for 2025 and expectations for the next 4 years (Discounted cash-flow)) as well as the value of the brand (Relied from Royalty method)". The long-term growth rate in the terminal period has been set to 2.25% so that it equals (2023: 2.25%), which is in line with long-term government bonds.

The expected long-term rate of inflation 2024 has shown no indication of impairment. It have been assessed that it is a single CGU as it is a single global brand. In the impairment test a discount rate of 9.3% was used for 2024 (2023: 9.3%).

Key assumptions used in value in use calculations and sensitivity to changes in assumptions:

- Gross margins
- Discount rates
- Raw materials price inflation

- Market share during the forecast period
- Growth rates used to extrapolate cash flows beyond the forecast period
- Marked based royalty rates

Likely changes in key assumptions is not expected to result in a impairment at 31 December 2024, due to the headroom between the recoverable value and carrying amount.

Development projects

Development projects in progress comprise ongoing development of new lighting fixtures that have not yet been completed. Not capitalized costs to development projects recognized in the income statement amounts in 2024 to DKK 2 million (2023: DKK 2 million). The cost of development projects comprises costs such as salaries, amortisation and indirect costs. New lighting fixtures are developed for the domestic market as well as markets abroad.

The development projects are regularly evaluated by management. In the evaluation the management evaluates the progress of the projects and the future market for the lighting fixtures.

NOTE 14

14. Trade receivables

The group’s credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company’s credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

The following table shows the breakdown by geographic areas of the amount of trade receivables, including the breakdown by geographic areas of the amount of the provision for write-down:

	Group		Parent	
	2024	2023	2024	2023
	mDKK	mDKK	mDKK	mDKK
Denmark	19	14	19	14
EEC*	43	20	5	4
Non-EEC	31	24	0	0
Total Trade Receivables	93	58	24	18

*EEC are defined as countries within the European Economic Community (EEC).

Group

Trade receivables, amounting to DKK 94 million, are broken down by maturity, without taking into account the loss allowance for bad debts of DKK 1 million

Parent

Trade receivables, amounting to DKK 24 million, are broken down by maturity, without taking into account the loss allowance for bad debts of DKK 0 million

	Group		Parent	
	2024	2023	2024	2023
	mDKK	mDKK	mDKK	mDKK
Trade receivables, gross	94	60	24	19
Loss allowance for bad debts beginning of year	-2	-1	-1	-1
Change in loss allowance, net	1	-1	1	0
Realised losses	0	0	0	0

Between one and five years	64	65	247	232
More than five years	22	37	22	37
Total maturity	175	245	280	326

The borrowings are mainly in DKK and EUR. Both non-current and current borrowing is with floating interest rates. The fair value of the floating rate loans approximates the carrying amount.

NOTE 18

18. Financial risk management

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

Market risk comprises three types of risk: interest rate risk, currency risk and other price risk.

The group's products are primarily positioned in the high-end markets.

The economic development in the professional and private consumer markets will affect the financial results.

Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates.

The Louis Poulsen Group's presentation currency is DKK, but a significant part of the Group's activities and investments are denominated in other currencies.

Consequently, there is a substantial risk of foreign exchange rate fluctuations having an impact on the Group's reported profit or loss, financial position and/or cash flow in DKK. Currency risk between DKK and EUR is not covered due to the Danish Government's fixed currency rate policy.

It is group policy to cover commercial exchange risks. Hedging is primarily used to cover open foreign exchange positions related to trading activities in the next twelve months based on the budget.

Where the budgettet quarterly netposition is above DKK 3 million, 80% for the net exposure is hedged.

The Louis Poulsen Group only hedges commercial exposures and consequently does not enter into derivative transactions for trading or speculative purpose.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Louis Poulsen's exposure to the risk of changes in market interest rates relates primarily to the Louis Poulsen's external interest bearing debt with floating interest rates.

Louis Poulsen has no external interest-bearing debt per December 31, 2024. The debt per December 31, 2023 was a bank loan with a variable interest.

Right of use liabilities are fixed and not influenced by interest rates.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Louis Poulsen Group is exposed to credit risk from trading partners and customers.

The group has no vital risks related to a trading partner or single customer.

The group's credit risks relate to trade receivables included in the balance sheet.

The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

For trade receivables, the exposures are managed globally through fixed procedures, and credit limits are set as deemed appropriate for the customer, taking local market conditions into account.

Liquidity risk

Liquidity is managed centrally and is continually assessed. It is ensured that, at any given time, sufficient financial resources are available.

Liqidity is budgettet each year and monthly follow up on deviations.

At year end the Group has a DKK 38 million positive cash-flow position.

Based on the financial reserves with banks and credit facilities available in credit institutions and from related parties, there are no significant liquidity risks.

Thers is no difference between the nomial amount and booked value.

Capital management

For the purpose of the Group’s capital management, capital includes issued capital and all other equity reserves attributable to the equity holders of the parent.

The primary objective of the Group’s capital management is to maximise the shareholder value.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders.

The Group monitors capital using a gearing ratio, which is ‘net debt’ divided by total capital plus net debt.

The Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and short-term deposits.

	Group	
	2024 mDKK	2023 mDKK
Interest-bearing loans and borrowings	0	48
Trade and other payables	268	244
Less: cash and short-term deposits	-38	-45
Net debt	230	247
Equity (total capital)	329	306
Capital and net debt	559	553
Gearing ratio	41%	45%

In order to achieve this overall objective, the Group’s capital management, among other things, meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches of the financial covenants of any interest-bearing loans and borrowing in the current period. No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2024 and 2023.

18. Financial risk management							
Louis Poulsen A/S has entered into forward exchange contracts for the following 12 months to secure sales and cost of goods sold in the following currencies:							
mDKK	Principal value of unrealised forward contracts end 2024	Principal value of unrealised forward contracts end 2023	Contract amount 2024	Positive fair value	Negative fair value	Weighted average contract rate	Covered period
2024							
Japanese yen (JPY)	1.395	1.334	65	1	0	0.046	12 months
Norwegian krone (NOK)	42	42	26	0	0	0.619	12 months
Swedish krone (SEK)	60	76	39	0	0	0.650	12 months
Chinese Yuan Renminbi (CNY)	34	31	32	1	0	0.941	12 months
			162	2	0		

All contracts are subscribed with the company’s bank. There is no hedging ineffectiveness in this period.

In 2024, there has been the following fair value adjustments of financial instruments:

	Fair value of financial instruments		Fair value adjustments through the equity		Fair value adjustments through the income statement	
	Group	Parent	Group	Parent	Group	Parent
	mDKK	mDKK	mDKK	mDKK	mDKK	mDKK
Financial instruments	2	2	2	2	5	5

Derivatives

Louis Poulsen uses foreign currency swaps to hedge its exposure against fluctuations in foreign currency prices.

	Group			Parent		
2024	Assets	Liabilities	Hedge reserve	Assets	Liabilities	Hedge reserve
Foreign currency swap	2	0	2	2	0	2
2023	Assets	Liabilities	Hedge reserve	Assets	Liabilities	Hedge reserve
Foreign currency swap	3	4	-1	3	4	-1

The fair value at 31 December 2024 and 2023 was measured in accordance with level 2 in the fair value hierarchy (IFRS 13). Level 2 is based on non-quoted prices, observable either directly or indirectly. Prices from third party specialists are used to quote the prices for unrealisedderivative financial instruments.

The value of the financial instruments recognised in other comprehensive income will be re-cycled from equity to profit & loss at the time the underlying cash flows from the hedging item is recognised in profit & loss i.e. within 12 months. All derivatives are also presented as short term on the balance sheet as maturity is within 12 months.

NOTE 18 CONTINUED

Exchange rate sensitivity analysis			
	Change in exchange rate	Profit / (Loss)	Equity
2024			
Japanese yen (JPY)	+10%	(6)	(3)
Norwegian krone (NOK)	+10%	(3)	1
Swedish krone (SEK)	+10%	(4)	1
Chinese Yuan Renminbi (CNY)	+10%	3	1
		(10)	0

NOTE 19

19. Other provisions
Other provisions mainly consist of provisions regarding pension accrual to employer pension in Germany amounting to DKK 12.5 million. Pension plans in Germany relates to approx. 60 former employees' defined benefit pension plans ending in 1999. The plan is governed by the employment laws of Germany. The level of benefits provided depends on the member's and the employer's annual contributions and the annuity factor at retirement age. The latest actuarial assessments of liabilities and assets have been made in 2024. The present value of the scheme's liabilities have been assessed using the Projected Unit Credit Method. The actuarial gain during the year amounts to DKK 0.1 million. Remaining pension plans are defined contribution pension plans, that are settle on a ongoing basis in accordance with local laws and regulations.
The following table summarise the components of net defined benefit pension recognised in the statement of profit or loss and the amounts recognised in the statement of financial position:

	Group	
	2024 mDKK	2023 mDKK
Defined benefit pension beginning of year	13	13
Actuarial changes	0	0
Interest cost	0	0
Benefits paid	0	0
Exchange differences	0	0
Defined benefit pension end of year	13	13

NOTE 20

20. Change in working capital	Group	
	2024 mDKK	2023 mDKK
Increase/decrease in inventories	6	43
Increase/decrease in receivables	-36	10
Increase/decrease in trade payables etc	30	9
Other changes	23	-37
	23	25

NOTE 21

21. Unrecognised rental and lease commitments	Group		Parent	
	2024 mDKK	2023 mDKK	2024 mDKK	2023 mDKK
Low value lease	1	1	1	1
Liabilities under rental or lease agreements until maturity in total	1	1	1	1

There are no short-term leases. Low-value assets are not recognized in the income statement.

NOTE 22

22. Contingent liabilities	Group		Parent	
	2024 mDKK	2023 mDKK	2024 mDKK	2023 mDKK
Recourse and non-recourse guarantee commitments	5	2	3	1
Contingent liabilities in total	5	2	3	1

Louis Poulsen A/S is in a Danish joint taxation arrangement in which Luminous Designs Investments ApS serves as the administration company. According to the joint taxation provisions of the Danish Corporation Tax Act, the Entity is therefore liable for income taxes etc for the jointly taxed entities, and for obligations, if any, relating to the withholding of tax on interest, royalties and dividend for the jointly taxed entities. The total known net liability of the jointly taxed entities under the joint taxation arrangement is evident from the administration company's financial statements.

The parent company (Louis Poulsen A/S) has, together with other companies in the Flos B&B Italia Group, jointly guaranteed for the notes issued by the related company Flos B&B Italia S.p.A. (indirect parent company of Louis Poulsen A/S) for an overall amount equal to EUR 932.5 million as at December 31, 2024. The guarantee has however been granted within the restrictions of the Danish Company act., including self-financing rules.

NOTE 27

27. New accounting regulations
With effect from 1 January 2024, the Group has implemented the amended standard and interpretation issued by IASB and endorsed by the EU to IAS 1. The amendment to IAS 1 has resulted in additional disclosures in the notes, but none of the changes have affected recognition and measurement in 2024 or are expected to affect the Group.
Except for the change mentioned within the Accounting Policies, none of the amendments that are issued, but not yet effective, are likely to impact the Consolidated Financial Statements.

NOTE 28

28. Events after the balance sheet date
Louis Poulsen has significant global operations, including in the US and China. After the balance sheet date, geopolitical tensions have arisen in the form of potential trade barriers, tariffs etc. These factors can create both opportunities and threats for the Group, without affecting the recognised assets and liabilities at the balance sheet date. No other event has occurred after the balance sheet date to this date, which may materially affect the assessment of the Company's financial position.

MATERIAL ACCOUNTING POLICIES

BASIS FOR PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

The financial part of the annual report for the period 1 January - 31 December 2024 comprises the consolidated financial statements of Louis Poulsen A/S and its subsidiaries (the Group) and separate financial statements for the parent company.

GENERAL ACCOUNTING POLICIES

This Annual Report has been prepared in accordance with IFRS® Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act applying to enterprises of reporting class C (large). Further they are prepared in accordance with IFRS as issued by the International Accounting Standards Board (“IASB”).

The preparation of these financial statements in conformity with IFRS requires management to exercise its judgement in the process of applying the Company’s accounting policies. It also requires the use of certain critical accounting estimates and assumptions. Areas involving a higher degree of judgement or complexity, or areas where estimates and assumptions are significant to the financial statements are further described at the end of the accounting policies for both the consolidated and parent company.

The Financial Statements are presented in Danish kroner (DKK), which is the functional currency of the Parent Company. All amounts are rounded to nearest million DKK.

The accounting policies are unchanged from last year, except for new standards or amendments as described in the section directly below for new and amended IFRS Standards.

NEW AND AMENDED IFRS STANDARDS

Louis Poulsen has adopted all new or amended IFRS Accounting Standards and interpretations (IFRS IC) as adopted by the EU and which are effective for the financial year 1 January to 31 December 2024.

The implementation of these new or amended standards and interpretations had no material impact on the consolidated financial statements for the year.

The new standards that are not yet effective are not expected to have any material impact on Louis Poulsen, except for IFRS 18 Presentation and Disclosure in Financial Statements, which was issued in April 2024 and will be effective from 2027, impacting presentation and disclosure of the Financial Statements. Louis Poulsen is currently evaluating the potential impact of this standard.

RECOGNITION AND MEASUREMENT

Assets are recognised in the balance sheet when it is probable as a result of a prior event that future economic benefits will flow to the Entity, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the Entity has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the Entity, and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement when earned, whereas costs are recognised by the amounts attributable to this financial year.

FUNCTIONAL AND PRESENTATION CURRENCY

The consolidated financial statements are presented in Danish kroner, DKK, which is also the functional currency of the Parent Company. Each subsidiary determines its own functional currency, and items recognised in the financial statements of each entity are measured using that functional currency.

CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements comprise the Parent and the group enterprises (subsidiaries) that are controlled by the Parent. Control is achieved by the Parent, either directly or indirectly, holding more than 50% of the voting rights or in any other way possibly or actually exercising controlling influence.

BASIS OF CONSOLIDATION

The consolidated financial statements are prepared on the basis of the financial statements of the Parent and its subsidiaries. The consolidated financial statements are prepared by combining uniform items. On consol-idation, intra-group income and expenses, intra-group accounts and dividends as well as profits and losses on transactions between the consolidated enterprises are eliminated. The financial statements used for con- solidation have been prepared applying the Group’s accounting policies.

Subsidiaries’ financial statement items are recognised in full in the consolidated financial statements.

Investments in subsidiaries are offset at the pro rata share of such subsidiaries’ net assets at the acquisition date, with net assets having been calculated at fair value.

BUSINESS COMBINATIONS

For business combinations such as the purchase and sale of equity interests involving companies controlled by the parent company, the book value method is applied, whereby the combination is deemed to have been completed on the

acquisition date without restatement of comparative figures. Differences between the agreed purchase price and the carrying amount of the acquired company are recognised recognised directly in equity.

FOREIGN CURRENCY TRANSLATION

On initial recognition, foreign currency transactions are translated applying the exchange rate at the transaction date. Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated using the exchange rate at the balance sheet date. Exchange differences that arise between the rate at the transaction date and the rate in effect at the payment date, or the rate at the balance sheet date are recognised in the income statement as financial income or financial expenses. Property, plant and equipment, intangible assets, inventories and other non-monetary assets that have been purchased in foreign currencies are translated using historical rates.

When recognising foreign subsidiaries and associates that are independent entities, the income statements are translated at average exchange rates for the months that do not significantly deviate from the rates at the transaction date. Balance sheet items are translated using the exchange rates at the balance sheet date.

Goodwill is considered belonging to the independent foreign entity and is translated using the exchange rate at the balance sheet date. Exchange differences arising out of the translation of foreign subsidiaries’ equity at the beginning of the year at the balance sheet date exchange rates as well as out of the translation of income statements from average rates to the exchange rates at the balance sheet date are recognised directly in equity.

Exchange adjustments of outstanding accounts with independent foreign subsidiaries which are considered part of the total investment in the subsidiary in question are classified directly as equity.

When recognising foreign subsidiaries that are integral entities, monetary assets and liabilities are translated using the exchange rates at the balance sheet date. Non-monetary assets and liabilities are translated at the exchange rate of the time of acquisition or the time of any subsequent revaluation or write-down. The items of the income statement are translated at the average rates of the months; however, items deriving from non-monetary assets and liabilities are translated using the historical rates applicable to the relevant non- monetary items.

DERIVATIVE FINANCIAL INSTRUMENTS

On initial recognition in the balance sheet, derivative financial instruments are measured at cost and subsequently at fair value. Derivative financial instruments are recognised under other receivables or other payables.

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging the fair value of a recognised asset or a recognised liability are recorded in the income statement together with changes in the value of the hedged asset or the hedged liability.

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging future transactions are recognised directly in equity. When the hedged transactions are realised, the accumulated changes are recognised as part of cost of the relevant financial statement items. For derivative financial instruments that do not comply with the requirements for being treated as hedging instruments, changes in fair value are recognised currently in the income statement as financial income or financial expenses.

Changes in the fair value of derivative financial instruments applied for hedging net investments in independent foreign subsidiaries or associates are classified directly as equity.

INCOME STATEMENT

Revenue
Revenue from the sale of manufactured goods and goods for resale is recognised in the income statement when delivery is made and risk has passed to the buyer. Revenue from the sale of services is recognised in the income statement when delivery is made to the buyer. Revenue is recognised net of VAT, duties and sales discounts and is measured at fair value of the consideration fixed.

PRODUCTION COSTS

Production costs comprise expenses incurred to earn revenue for the financial year. Production costs comprise direct and indirect costs for raw materials and consumables, wages and salaries, rent and lease as well as amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment included in the production process. In addition, the item includes ordinary write-down of inventories.

SALES AND DISTRIBUTION EXPENSES

Sales and distribution expenses comprise costs incurred for sale and distribution of the Entity’s products, including wages and salaries for sales staff, advertising costs, travelling and entertainment expenses, etc. as well as amorti- sation, depreciation and impairment losses relating to intangible assets and property, plant and equipment attached to the sales and distribution process.

ADMINISTRATIVE EXPENSES

Administrative expenses comprise costs incurred for the Entity’s administrative functions, including wages and salaries for administrative staff and Management, stationery and office supplies as well as amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment used for administration of the Entity.

“Choosing colours should not be a gamble. It should be a conscious decision. Colours have a meaning and a function.”

- Verner Panton

FINANCIAL INCOME

Financial income comprises interest income, including interest income on receivables from group enterprises, net capital gains on securities, payables and transactions in foreign currencies, amortisation of financial assets as well as tax relief under the Danish Tax Prepayment Scheme etc.

FINANCIAL EXPENSES

Financial expenses comprise interest expenses, including interest expenses on payables to group enterprises, net capital losses on securities, payables and transactions in foreign currencies, amortisation of financial liabilities as well as tax surcharge under the Danish Tax Prepayment Scheme etc.

INCOME TAX EXPENSES

Income tax expenses for the year, which consists of current tax for the year and changes in deferred tax, adjustment to prior years and changes in provision for uncertain tax position, is recognised in the income statement by the portion attributable to the profit for the year and recognised directly in equity by the portion attributable to entries directly in equity.

The Entity is jointly taxed with its ultimate owner and all Danish subsidiaries. The current Danish income tax is allocated among the jointly taxed entities proportionally to their taxable income (full allocation with a refund concerning tax losses).

BALANCE SHEET

GOODWILL

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-

generating unit retained.

FAIR VALUE

The fair value measurement is based on the principal market. If no principal market exists, the measurement is based on the most advantageous market, i.e. the market that maximises the price of the asset or liability less transaction and/or transport costs.

All assets and liabilities which are measured at fair value, or whose fair value is disclosed, are classified based on the fair value hierarchy, see below:

- Level 1: Value in an active market for similar assets/liabilities
- Level 2: Value based on recognised valuation methods on the basis of observable market information
- Level 3: Value based on recognised valuation methods and reasonable estimates (non-observable market information).

If a reliable fair value cannot be stated according to the above levels, the asset or liability is measured at cost.

INTANGIBLE ASSETS

Intangible assets comprise development projects completed and in progress with related intellectual property rights, acquired intellectual property rights and prepayments for intangible assets.

Development projects on clearly defined and identifiable products and processes, for which the technical rate of utilisation, adequate resources and a potential future market or development opportunity in the enterprise can be established, and where the intention is to manufacture, market or apply the product or process in question, are recognised as intangible assets. Other development costs are recognised as costs in the income statement as incurred. When recognising development projects as intangible assets, an amount equaling the costs incurred is taken to equity under Reserve for development costs that is reduced as the development projects are amortised and written down.

The cost of development projects comprises costs such as salaries and amortisation that are directly and indirectly attributable to the development projects.

Indirect production costs in the form of indirectly attributable staff costs and amortisation of intangible assets and depreciation on property, plant and equipment used in the development process are recognised in cost based on time spent on each project.

Completed development projects are amortised on a straight-line basis using their estimated useful lives which are determined based on a specific assessment of each development project. If the useful life cannot be estimated reliably, it is fixed at 10 years. For development projects, protected by intellectual property rights, the maximum amortisation period is the remaining duration of the relevant rights. The amortisation periods used are 5 years.

Intellectual property rights acquired are measured at cost less accumulated amortisation. Patents are amor- tised over their remaining duration, and licenses are amortised over the term of the agreement, but over no more than 20 years. Intellectual property rights etc. are written down to the lower of recoverable amount and carrying amount.

LEASES

Leased assets and lease commitments are recognised in the balance sheet when the leased asset under a lease entered into regarding a specific identifiable asset is made available to the Group in the lease term, and when the Group obtains the right to almost all economic benefits from the use of the identified asset and the right to control the use of the identified asset. On initial recognition, lease commitments are measured at the present value of the future lease payments discounted by an incremental borrowing rate. The following lease payments are recognised as part of the lease commitment:

- Fixed payments.
- Variable payments that change concurrently with changes to an index and an interest rate based on said index or interest rate.
- Payments overdue subject to a residual value guarantee.
- Exercise price of call options that it is highly probable that Management will exercise.
- Payments subject to an extension option that it is highly probable that the Group will exercise.
- Penalty related to a termination option unless it is highly probable that the Group will not exercise the option.

The lease commitment is measured at amortised cost according to the effective interest method. The lease commitment is recalculated when the underlying contractual cash flows change due to changes in an index or an interest rate if the Group’s estimate of a residual value guarantee changes or if the Group changes its assessment of whether call options, extension options or termination options can reasonably be expected to be exercised.

On initial recognition, the leased asset is measured at cost, corresponding to the value of the lease commitment adjusted for prepaid lease payments plus directly related costs and estimated costs for demolition, repairs or the like and less discounts or other types of incentive payments received from the lessor.

Subsequently, the asset is measured at cost less accumulated depreciation and impairment losses. The leased asset is depreciated over the shorter of the lease term and the useful life of the leased asset. Depreciation charges are recognised on a straight-line basis in the income statement.

The leased asset is adjusted for changes to the lease commitment due to changes to the terms of the lease or

changes to the cash flows of the lease concurrently with changes to an index or an interest rate.

Leased assets are depreciated on a straight-line basis over the expected lease term, which is:

Cars	1-4 years
Office supply	3 years
Properties over lease term	1-15 years

The Group presents the leased asset and the lease commitment separately in the balance sheet.

The Group has chosen not to recognise leased assets of a low value and short-term leases in the balance sheet. Instead, related lease payments are recognised on a straight-line basis in the income statement.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the acquisition price, costs directly attributable to the acquisition and preparation costs of the asset until the time when it is ready to be put into operation.

The basis of depreciation is cost less estimated residual value after the end of useful life. Straight-line depreciation is made on the basis of the following estimated useful lives of the assets:

Plant and machinery	5 years
Other fixtures and fittings, tools and equipment	2-5 years
Leasehold improvements	5-14 years

For leasehold improvements and assets subject to finance leases, the depreciation period cannot exceed the contract period. Estimated useful lives and residual values are reassessed annually. Items of property, plant and equipment are written down to the lower of recoverable amount and carrying amount.

INVESTMENTS IN GROUP ENTERPRISES

Investment in subsidiaries are measured at cost. If cost exceeds the recoverable amount, a write-down is made to this lower value

INVENTORIES

Inventories are measured at the lower of cost using the FIFO method and net realisable value.

Cost consists of purchase price plus delivery costs. Cost of manufactured goods and work in progress consists of costs of raw materials, consumables, direct labour costs and indirect production costs.

Indirect production costs comprise indirect materials and

labour costs, costs of maintenance of, depreciation of and impairment losses relating to machinery, factory buildings and equipment used in the manufacturing process as well as costs of factory administration and management. Financing costs are not included in cost.

The net realisable value of inventories is calculated as the estimated selling price less completion costs and costs incurred to execute sale.

INVENTORY OBSOLESCENCE

In general the majority of the products are evergreens. Finish goods are very rarely sold at prices lower than production prices. Risk on inventories more relates to raw materials or semi fished goods where either quantities are too high compared to consumptions or goods are related to discontinued products.

Procedures and policies are in place to identify and write down on goods, where costs exceeds net realisable value.

RECEIVABLES

Trade receivables are initially recognised at fair value equal to the transaction price, and subsequently measured at amortised cost less allowance for lifetime expected credit losses.

Trade receivables are written off when all possible options have been exhausted and there are no reasonable expectations of recovery.

The Louis Poulsen Group applies the simplified approach to measure expected credit loss and a lifetime expected loss allowance for all trade receivables.

PREPAYMENTS

Prepayments comprise incurred costs relating to subsequent financial years. Prepayments are measured at cost.

CASH

Cash comprises cash in hand and bank deposits.

DEFERRED TAX

Deferred tax liabilities and deferred tax assets are measured according to the temporary difference approach, which means that all temporary differences between the carrying amount and the tax base of assets and liabilities are recognised in the Statement of Financial Position as deferred tax assets and deferred tax liabilities.

Deferred tax reflects the impact of any temporary differences. To the extent calculated deferred tax is positive, this is recognised in the Statement of Financial Position as deferred tax assets at the expected realisable value. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred tax assets, including the tax base of tax loss carryforwards, are

recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

INCOME TAX PAYABLE OR RECEIVABLE

Current tax payable or receivable is recognised in the balance sheet, stated as tax calculated on this year's taxable income, adjusted for prepaid tax.

EQUITY

Hedge reserve comprises fair value of derivative financial instruments qualifying as hedge of future assets or liabilities. Translation reserve comprises foreign exchange differences from translating foreign entities and long-term loans to foreign entities.

The reserve for development costs comprises recognised development costs. The reserve cannot be used to distribute dividend or cover losses. The reserve will be reduced or dissolved if the recognised development costs are no longer part of the Company's operations by a transfer directly to the distributable reserves under equity.

Dividend proposed for the year is recognised as a liability in the financial statements at the time of adoption by the shareholders at the Annual General Meeting. The dividend proposed in respect of the financial year is stated as a separate item under equity.

OTHER PROVISIONS

Other provisions comprise anticipated costs of non-recourse guarantee commitments, returns, defined benefit plans, decided and published restructuring, etc.

Other provisions are recognised and measured as the best estimate of the expenses required to settle the liabilities at the balance sheet date. Provisions that are estimated to mature more than one year after the balance sheet date are measured at their discounted value.

Under defined benefit plans, the Group has an obligation to pay a fixed amount or a fixed percentage of the salary at retirement. This means that the Group carries the risk of any changes in the actuarially calculated capital value of the pension plans. Annual actuarial calculations are made of the present value of the future benefits to which the employees are entitled. The present value is calculated based on a number of assumptions relating to the future development in salary levels and interest, inflation, and mortality rates. The present value of the defined benefit obligation is recognised in the balance sheet as a liability. Actuarial gains or losses are recognised directly in equity.

OTHER CURRENT DEBT

Other current debt are measured at amortised cost, which usually corresponds to nominal value. This comprises all uncommitted loans, and committed loans and credit facilities, with maturity less than 1 year. Furthermore, suppliers and affiliates are included. Other debt comprises employee-

related debt, other debts to authorities, derivative financial instruments, sales incentives, licenses and royalty debt.

CASH FLOW STATEMENT

The cash flow statement shows cash flows from operating, investing and financing activities as well as cash and cash equivalents at the beginning and the end of the financial year. Cash flows from operating activities are presented using the indirect method and calculated as the operating profit/loss adjusted for non-cash operating items, working capital changes and income taxes paid.

Cash flows from investing activities comprise payments in connection with acquisition and divestment of enterprises, activities and fixed asset investments as well as purchase, development, improvement and sale, etc. of intangible assets and property, plant and equipment, including acquisition of assets held under finance leases.

Cash flows from financing activities comprise changes in the size or composition of the contributed capital and related costs as well as the raising of loans, inception of finance leases, instalments on interest-bearing debt, purchase of treasury shares and payment of dividend.

Cash and cash equivalents comprise cash and short-term securities with an insignificant price risk less short-term bank loans.

MATERIAL ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

When preparing the Financial Statements it is necessary that Management makes accounting estimates and judgements that affect the reported amounts of assets and liabilities and the reported amounts of revenue and expenses.

The estimates and underlying assumptions are reviewed on an ongoing basis.

The key accounting estimates identified are those that have a significant risk of resulting in a material adjustment. The estimates are expectations of the future, or other sources of estimation uncertainty, based on assumptions.

Management believes that the estimates are the most likely outcome of future events. Management bases the estimates on historical experience and other assumptions that Management assesses are reasonable under the given circumstances. Actual results may differ from these estimates under different assumptions or conditions.

Accounting judgements are made when applying accounting policies. Key accounting judgements are the judgements made, that can have significant impact on the amounts recognised in the Financial Statements.

Further information on the areas that involve a high degree of estimation and judgement and are material to the financial statements, can be obtained in the respective notes.

INVENTORIES

The carrying amount of inventories is based on a number of assumptions including assumptions on future events. Inventories are adjusted to reflect the net realisable value, comprising actual cost less provisions for obsolescence.

When the net realisable value is lower than cost, inventory items are impaired and measured at net realisable value. The calculation of write down is based on the Louis Poulsen Group's internal impairment policy, which in general is evaluated based on a combination of assumptions on demand planning and product movements.

LEASES – ESTIMATING THE INCREMENTAL BORROWING RATE AND LEASE TERM

The Company cannot readily determine the implicit borrowing rate, therefore it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of similar value to the right-to-use asset in a similar economic environment. The IBR therefore reflects what the Company “would have to pay”, which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the leases. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the Company's stand-alone credit rating).

IMPAIRMENT OF GOODWILL

In accordance with IAS 36, Goodwill is not subject to amortisation and it is instead tested for impairment at least once a year.

For impairment test purposes Louis Poulsen is considered as one single Cash Generating Unit.

The recoverable amount has been determined based on the calculation of value in use. In which the projections of the cash flows were those assumptions made in the initial business plan.

The calculation of the value in use in particular sensitive to the following assumptions:

- Revenue trends
- Marginality
- discount rate
- growth rates

Please refer to the respective note of intangible assets in the consolidated financial statements.

STATEMENT BY THE MANAGEMENT

STATEMENT BY THE MANAGEMENT

The Board of Directors and the Executive Board have today considered and approved the annual report of Louis Poulsen A/S for the financial year 2024.

The annual report is presented in accordance with the IFRS Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statement Act.

In our opinion, the financial statements give a true and fair view of the Entity's financial position at 31 December 2024 and of the results of its operations and cash flows for the financial year 1 January – 31 December 2024.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's activities and financial matters, results for the year, cash flows and financial position as well as a description of material risks and uncertainties that the Company faces.

We recommend the annual report for adoption at the Annual General Meeting.

INDEPENDENT AUDITOR'S REPORT

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF LOUIS POULSEN A/S

OPINION

We have audited the consolidated financial statements and the parent company financial statements of Louis Poulsen A/S for the financial year 1 January – 31 December 2024, which comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity, cash flow statement and notes, including material accounting policy information, for the Group and the Parent Company. The consolidated financial statements and the parent company financial statements are prepared in accordance with IFRS Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2024 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 January – 31 December 2024 in accordance with IFRS Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements and the parent company financial statements" (hereinafter collectively referred to as "the financial statements") section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

INDEPENDENCE

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

STATEMENT ON THE MANAGEMENT'S REVIEW

Management is responsible for the Management's review. Our opinion on the financial statements does not cover the Management's review, and we do not express any assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements, or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on our procedures, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

MANAGEMENT'S RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation of consolidated financial statements and parent company financial statements that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Group or the Parent Company or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

- As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements and the parent company financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
